

MODERNIZE UTILITY OPERATIONS WITH MOBILE MAINTENANCE

Maintain equipment, stay connected in the field, and keep the lights on for every customer.

Utility operations need to minimize operational risk and modernize services while managing costs. This is becoming more challenging as wild weather leads to more outages, and a growing skilled labor shortage has stressed resources. Paper-based processes are also holding back progress.

Mobility and automation solutions for SAP® will reduce operating costs, increase wrench time, and improve customer experience. You'll experience less downtime and increased revenue. Sigga simplifies the switch to digital with solutions that are designed to adapt to your way of working.

With Sigga mobile maintenance and planning and scheduling solutions, utility operations can experience results like these:

Increase Revenue

Reduce unplanned shutdowns and make every maintenance interaction more efficient to ensure your equipment is operating at full capacity.

Simplify Scheduling

Automatically check capacities, assign resources, prioritize work orders, track order status, and make informed decisions based on real-time data in SAP.

Access Information Anywhere

Maintenance professionals have everything they need in the field for predictive, preventive, or urgent breakdown repairs, online or offline. Sigga's mobile maintenance app automatically syncs when online for full visibility to work status.

Increase Uptime

Increase efficiency in every aspect of maintenance to improve asset reliability and prevent outages. Ensure the right person with the right knowledge arrives at the job at the right time. And when the techs are onsite, they have the parts and information they need at their fingertips.

Reduce costs

With improved staff productivity, reduce overtime and contractor costs. Completely cut the use of paper and significantly reduce administrative tasks for data entry and work order preparation.

Reduce Compliance Risk

Create up-to-date safety and work order checklists. Ensure data accuracy through structured real-time data capture.

CUSTOMER TRANSFORMATION SUCCESS

Leading utility companies who use Sigga for end-to-end digital work management, experienced, on average:

More than
 **\$600,000**
in annual savings

 **21%**
fewer breakdown orders

 **24.5%**
fewer administrative hours

REDUCE EXPENSES BY 25%

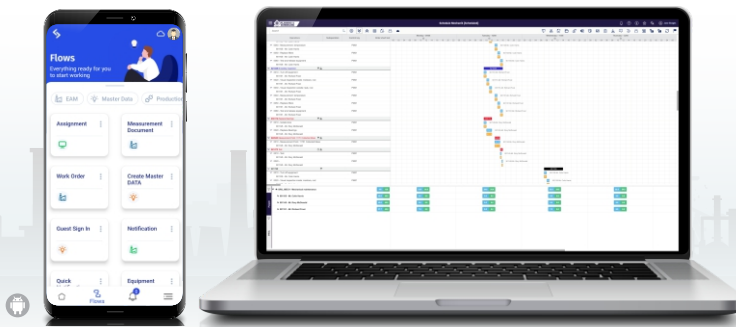

“Utility companies can reduce operating expenses by up to 25% through digital transformation of operations while achieving a performance gain of 20- 40% in areas such as safety, reliability, and regulatory compliance.”

McKinsey & Company

YOUR PARTNER FOR MAINTENANCE TRANSFORMATION

Sigga understands the rapidly evolving utility industry. We will be your partner to guide you through modernization efforts that reduce costs and bring more stability to the grid. Investing in digital maintenance tools now will lead to longer-term cost savings and reduced regulatory risk.

More than 70,000 technicians across the globe use Sigga mobile apps every day.

And leading utilities rely on Sigga Planning & Scheduling.
