

MOBILIZE YOUR MAINTENANCE WORKFORCE WITH SIGGA EAM EMPOWER™ MOBILE APP

Transform Your Maintenance Workforce

Reduce Costs

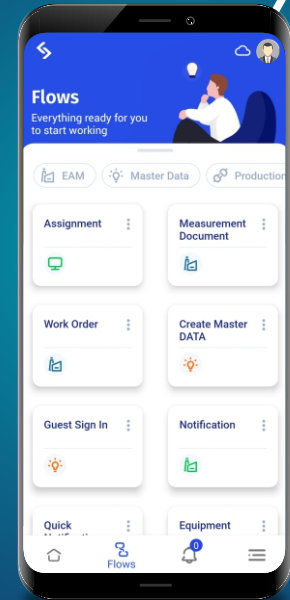

Increase Uptime

Prioritize Resources

Improve Quality

Sigga Mobile EAM Empower digitizes the entire maintenance process and connects users in real time via an intuitive mobile app. Replace paper-based processes including work orders and operator rounds with mobile routines that sync data real-time with SAP.

With Sigga mobile EAM Empower™:

- Improve Operational Equipment Efficiency (OEE)
- Reduce operational costs
- Increase technician wrench time
- Capture data in real-time
- Improve data accuracy
- Access all information online or offline
- Minimize accidents and improve safety

THE MOST COMPLETE MOBILE MAINTENANCE SOLUTION

Sigga EAM Empower is purpose built for maintenance and repair workflows. It puts the power of mobility and real-time data access into technician's hands.

ORDERS

Execute planned orders or create new ones for immediate service. In addition, reserve materials, capture measurement readings, and job duration.

NOTIFICATIONS

Create new notifications, add pictures and videos, import SAP maintenance notes, and turn notifications into work orders.

MEASUREMENT

View, create and share measurement documents, and equipment data, online or offline.

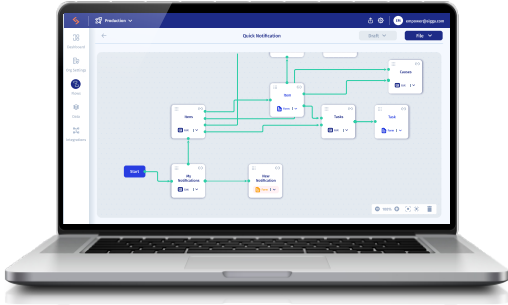

ASSETS

Look up equipment and functional location details. Capture moves or changes to equipment locations.

CUSTOMER SUCCESS

Ambev, a part of AB InBev, the largest brewer in the world, saw a 79% reduction in MTTR (Mean Time to Repair) – from 24 to 5 days. How? By replacing paper-based maintenance processes with Sigga's Mobile EAM solution. Technician productivity increased by 15% and MTBF (Mean Time Between Failures) increased by 10% resulting in greater production capacity. Ambev also saved \$360,000 annually by eliminating the printing of 7.2 million sheets of paper.

ACCELERATE YOUR DIGITAL TRANSFORMATION WITH A NO-CODE PLATFORM

Sigga EAM Empower is a flexible mobile EAM app for SAP® PM that adapts to your business needs without expensive and time-consuming customizations. Give non-technical business users more power to build workflows designed specifically for their needs with intuitive drag and drop building blocks, no coding required.

Preserve IT resources with no-code SAP integration which quickly connects the app with SAP in just a few clicks – no developers required.

Proven, around the world, by more than 70,000 users in asset-intensive industries.

BENEFITS OF DIGITIZATION IN MAINTENANCE

10-20% Increase in Asset Uptime³

4-10% Profit Improvement¹

2.5x Increase in Wrench Time²

15-30% Cost Savings
