

THE MOST EXPERIENCED GLOBAL SOFTWARE PROVIDER OF SCALABLE AUTOMATION AND MOBILE SOFTWARE FOR SAP EAM

MOBILIZE YOUR MAINTENANCE WORKFORCE WITH SIGGA EAM EMPOWER™ MOBILE APP

Sigga EAM Empower™ includes Sigga's leading mobile EAM functionality with a no-code platform to easily adapt workflows to your business needs without customizations. Replace paper and put mobile devices in the hands of your technicians to gain a step-change improvement in your KPIs. Increase wrench time, asset uptime, and reduce maintenance costs while improving data quality and real-time visibility in SAP.

SAP® Certified
Integration with SAP S/4HANA®

The no-code platform has an intuitive drag & drop interface that is based on common business logic, not software codes. It provides flexibility, time, and cost-savings for you and your IT team to easily deploy proven mobile experiences and adapt as you go.

More Efficiently Manage Your Maintenance Resources

Sigga Planning & Scheduling™ software provides an intuitive interface to preserve your time and improve utilization of your maintenance staff. You can use the automation to create annual maintenance budgets and then regularly track actuals to the plan. The software completes the planning of work orders by automatically checking capacities, availabilities, and identifying resources in order to create the schedule. Visual tile and Gantt views allow you to make final adjustments, and then with the push of a button, you can update work orders in SAP to be dispatched. To further extend the automation, the solution allows for the addition of custom rules for your unique planning criteria.

Improve Worker Efficiency and Data Accuracy

Sigga Warehouse & Inventory™ provides a mobile interface for controlling inbound and outbound warehouse stock movements while maintaining data real-time in SAP. Take full advantage of barcodes, RFID, and more integrated technologies for quick, accurate tracking of stock movements and inventory counting. And since warehouse locations often have signal issues, Sigga mobile apps are designed for full offline experiences and online background auto-sync.

SAP® Certified
Integration with SAP S/4HANA®

The power to change, adapt and grow is in your hands. Empower your maintenance workforce today with task simplification that saves time and money.
